

TOP 20 REASONS TO BUY A DUAL PRO

1. New Millennium Charging Technology.

Exclusive method that incorporates failsafe, step down power supplies, silicon controlled rectifiers (SCR's), highly advanced integrated circuitry and a new microprocessor that not only assures a full charge but keeps your batteries conditioned for extended life.

2. Safest Chargers Ever Manufactured.

Protected against reverse polarity, short circuits, over voltage and ground faults and will not allow sparking or arcing under any conditions.

3. Most Reliable Chargers On The Market Today.

Our chargers are designed to last for the lifetime of your equipment. The return rate is less than two percent-well over 300,000 in service.

4. Charges Batteries to 100% Without Overcharging.

Our chargers will bring the batteries to 100% of their full potential. Our tests against major competitors confirm that we achieve both the highest Specific Gravity and longest discharge times of any charger on the market without overcharging.

5. Full Shut-Off After Charge. No Trickle Charge.

Most equipment owners are looking for a charger that has a full shut-off since they know that this is the best way to prevent overcharging and "frying" their batteries. We have a full shut-off and a monitoring system that allows our chargers to return to charge mode only as needed.

6. Trouble Free - Just Plug It In And Forget It.

This is the number one comment that we hear from our customers. We recommend that the chargers be plugged in to power at all times since it has the automatic shut-off and automatic return to charge features. This makes our chargers ideal for both overnight charging and long term storage.

7. Totally Independent Chargers In The Same Housing.

We use independent power supplies and totally independent electronic circuits for each bank of our chargers. This allows for separate and simultaneous charging of each battery. For example, our Three Bank Pro Charger actually contains three separate battery chargers.

8. Monitors The Ambient Temperature To Assure A Full Charge.

A unique feature of our chargers is a temperature sensing device located in the leads going to each battery. By automatically adjusting the charge for any given ambient temperature, we assure a full charge in all weather conditions.

9. True Reverse Polarity Protection.

When the leads of the chargers are accidentally touched together or connected to the wrong poles of a battery, no sparking or arcing will occur and the charger's circuits will not be damaged. Before the charger can deliver current it must be connected properly to a battery.

10. Fully Waterproof.

We were the first completely waterproof charger on the market. Our chargers are sealed in a waterproof case that protects the electrical components without smothering them and causing severe overheating.

11. Most Economical.

Our chargers are competitively priced with others on the market. In the long term we save the equipment owner money by prolonging the life of his batteries. The best thing you can do to extend battery life and performance is to keep a full charge on the battery without overcharging it. We accomplish this better than any other chargers.

12. No Mounting Restrictions.

Since our chargers generate very little heat, there are no mounting restrictions. To our knowledge we have the only chargers with this feature.

13. Available In Stainless Steel Models.

We offer all of our chargers in a stainless steel case for about 10% more money.

14. Designed And Manufactured In The U.S.A.

We design our own products and they are manufactured by our company in Nashville, Tennessee. This gives us total control of product quality and assures our commitment to customer service.

15. FCC Part 15 A and B Interference Compliance.

Our chargers are in total compliance with these FCC Regulations. Most chargers do not comply and some competitors have been taken off the market for this reason.

16. Recommended By Battery Manufacturers.

If you were to ask most major manufacturers, chances are they would tell you that our chargers charge their batteries better than any other charger on the market. Some are considering extending their battery's warranty if the customer uses one of our chargers.

17. Chargers Of Choice For Major Equipment Manufacturers.

We market our chargers to OEM's, Distributors, and Dealers in the following industries: Marine, Trucking, Material Handlers, Fire Engines, Rescue Vehicles, Hi-Tech Industrial Equipment, Golf Carts, RVs, Wheel Chairs and Others.

18. C.E. Approval For European Customers.

We have one of the few battery chargers that have C.E. approval. This certification is required for battery chargers installed on equipment to be sold on the European Market.

19. Best Warranty And Customer Service.

We are known for having the best possible customer service. Our three year, no hassle, warranty is unconditional. We ship a free replacement the same day we find out about a problem, and we pay the freight both ways.

20. One Year Money-Back Satisfaction Guarantee.

We offer our customers a full year to try our chargers and if they are not completely satisfied, we will take the product back and give them a full refund of the purchase price. The only offer of this kind anywhere.
