

DUAL POWER

LEAVES OTHER CHARGERS IN IT'S WAKE!

Model: 36V/12V (36V & 12V Dual Output)

Dual Power charges your marine batteries nearly **2x FASTER** than other chargers in it's class and it's **only 12 lbs.**

Dual Power high frequency chargers simultaneously charge your cranking battery independently and your trolling motor batteries together in series.

The result... fast, dependable, efficient charging.

PROView® Link

- Provides wireless access to remotely monitor charge details of your batteries from your portable device (Free to download)
- Allows you to modify the charge algorithm

B.O.S. — Battery Optimization System (optional)

- Actively shuttles energy between batteries to keep "the pack" balanced, increasing battery strength and longevity

FASTER! STRONGER!! LONGER!!!

PRO Charging Systems

Dual Power Spec Sheet

Pro Charging Systems high frequency chargers have a smaller footprint and lighter weight than our transformer based chargers. For more details contact PCS at 866.755.8399.

Part Number: DP36/12 (36V & 12V Dual Output)

- 12.5" x 7.25" x 4.75"
- 12 POUNDS
- 800 WATT PLATFORM
- INPUT: 85-265 VAC 50-60 HZ
- IP67 IP68 PENDING
- UL 1564, CE
- 89% OVERALL EFFICIENCY
- .98 POWER FACTOR
- DELIVERABLE AS SINGLE OUTPUT OR DUAL OUTPUT
- BTLE COMMUNICATION VIA ANDROID AND iOS APP
- CANbus OPTION (J1939/NMEA2000)
- FIELD BOOTLOADABLE FIRMWARE VIA BTLE
