

Battery Fuel Gauge

Onboard Electric Vehicle - Rectangle

PRO Charging Systems

Introducing The Most Advanced and Reliable Battery Fuel Gauge

- Accurately Displays Battery Pack State
- Utilizes Advanced Firmware
- Intelligently Detects Battery Pack Charge Status
- Advanced Microprocessor Constantly Evaluates Battery Pack State
- TROUBLE FREE — **Easy Installation - Connect It and Forget It!**
- Durable, Water Resistant - Made in the USA and Built To Last

DeltaVolt[®]
Intuitive Charging Technology

May be used in many types of applications including: **Golf Carts, Hunting Buggies, Electric Utility Vehicles, LSVs, Aerial Lifts, Lift Trucks, Scrubbers, Lawn Equipment, Emergency Vehicles, Boats and More...**

The Pro Charging Systems (PCS) Battery Fuel Gauge solves one of the most common complaints about battery status indicators currently on the market— that most battery status indicators are not accurate or reliable. Many employ old technologies. (PCS) battery fuel gauges change that paradigm. Think the old “Motorola Brick Phone” from the late 1980’s versus today’s I-Phone. PCS battery fuel gauges measure a battery’s energy state with precision and accurately displays the information. At a glance, the gauge is easy to read and understand. Since the system utilizes intuitive technology, it fits and adapts to a wide range of applications. We take great pride in the performance, quality and versatility of our products backed by exceptional customer service.

Features of the Battery Fuel Gauge:

- Nine LED array shows level of battery pack depletion
- LED array flashes while charging the battery pack
- Low Battery Voltage LED Indicator - Red indicator flashes warning and stays on when charging is required
- Status self-adjusts while charging is in progress
- Rugged PC ABS polymer case/water resistant design
- For use with Lead Acid (Wet Cell) and AGM batteries
- Installation is simple and requires a 1.065”x1.58” cutout

Horizontal configuration is standard. Available in vertical configuration upon request. (When ordering add “V” to the end of model number. ie. BFGOVR12VV)

Model	Configuration	Weight	Size	Cable	Sample Battery Configuration
BFGOVR 12V	Horizontal, Add “V” for Vertical	8 oz.	2.1” x 1.25”	13.0’	12V System - 1-12V Battery, 2-6V Batteries
BFGOVR 24V	Horizontal, Add “V” for Vertical	8 oz.	2.1” x 1.25”	13.0’	24V System - 2-12V Batteries, 4-6V Batteries
BFGOVR 36V	Horizontal, Add “V” for Vertical	8 oz.	2.1” x 1.25”	13.0’	36V System - 3-12V Batteries, 6-6V Batteries
BFGOVR 48V	Horizontal, Add “V” for Vertical	8 oz.	2.1” x 1.25”	13.0’	48V System - 4-12V Batteries, 8-6V Batteries, 6-8V Batteries
BFGOVR 64V	Horizontal, Add “V” for Vertical	8 oz.	2.1” x 1.25”	13.0’	64V System - 8-8V Batteries
BFGOVR 72V	Horizontal, Add “V” for Vertical	8 oz.	2.1” x 1.25”	13.0’	72V System - 6-12V Batteries, 9-8V Batteries, 12-6V Batteries
