- TROUBLE FREE—**Just Plug It In and Forget It!**
- Join Over 750,000 of Our Satisfied Customers!
- Fully Automatic and Totally Waterproof

Charge On The Run is a revolutionary product that has proven to be an important advantage to serious fishermen everywhere. This unit utilizes boat engine charging current to charge trolling motor batteries while the engine is running. There are no connections to the ignition system or engine. Just connect to starting and trolling motor batteries. Up to 30% more batter time on the water Great for windy days when your batteries need to be at their strongest. Fully waterproof with reverse polarity protection and short circuit protection.

Features of Charge On The Run
